

# Benchmarking Report Card 2022-23

This is the benchmarking report card for your school. It captures highlights of your school's spending compared with a small number of schools that share similar characteristics. The report card draws on published spending and staffing data from 2022-23 for local authority-maintained schools.

The first column in each chart shows your school. The school in the second column is the similar school that is geographically closest to your school. The remaining schools are those most statistically similar based on your school's free school meals (FSM) and special educational needs (SEN) rates. Primary, secondary, and special schools are only compared with one another.

The report card can be used to stimulate discussion within the school leadership and governance team to discover where resources may be used more effectively, and to prompt more sharing of best practice among schools.

The report card might prompt you to look at the following:

- Why are you spending more in a particular category than similar schools? Could you be more efficient or do you have unique circumstances compared with those schools?
- What might you do to achieve the greatest efficiency in that category?
- What could you learn by contacting the similar schools?

You can also use the [schools financial benchmarking service on GOV.UK](#) or [View my financial insights](#) to compare similar schools' spending in more detail. This allows you to make a wide range of comparisons with other schools on different categories of spend, choose the criteria to identify schools to compare with and produce customised reports.

You can find further guidance and tools on school resource management [on GOV.UK](#).

## Areas of interest for all schools

These charts identify areas that are likely to be relevant to all schools in ensuring they make the best use of their available resources.

Your current expenditure on teaching staff is below the average for your comparison group by 7.7 percentage points.

There is some evidence that greater relative spend on teachers tends to be associated with higher attainment. Of course, simply spending a greater proportion of a school budget on teaching does not guarantee results. The most efficient schools deploy their workforce effectively; taking care to review their staffing structures, focussing on improving the quality of teaching and considering the best use of teachers' time

Given that spending on teachers makes up the majority of school spending, it's especially important to make sure you're managing your resources in the best way possible.

Your current expenditure on administrative/clerical functions is above the average for your comparison group by 2.5 percentage points.

This category refers to spend on administrative and clerical staff, administrative supplies and bought-in services such as legal and auditor costs.

Efficiencies in administrative/clerical expenditure could be made by upskilling staff, changing professional services supplier or reducing waste. Greater collaboration can also achieve greater efficiency and increase buying power. For more procurement guidance please click [here](#).

Your current revenue reserve is below the average for your comparison group by 4.9 percentage points.

This graph shows the number of pupils to teachers. When reviewing staffing structures schools should consider pupil-teacher ratios in comparable schools, as well as allocation of classroom-based support staff.

## Areas for further investigation

The following areas have been identified as ones where your school may be able to improve the use of available resources. These are the expenditure categories where your expenditure is highest compared with the average of your comparison group.

**Energy (% of total expenditure)**

Your current expenditure on energy is above the average for your comparison group by 2.0 percentage points.

Energy costs vary for a number of reasons. That said, there are often opportunities to save on the unit cost of energy by improving procurement, as well as to reduce the use of energy through better in-school practice.

**ICT learning resources (% of total expenditure)**

Your current expenditure on ICT resources is above the average for your comparison group by 1.7 percentage points.

Procurement guidance including guidance on cloud computing services can be found [on GOV.UK](https://www.gov.uk).

It is particularly important with ICT spending that there is a clear plan and review process to ensure that investment has a positive impact on pupil attainment.

### Your comparator schools

The following schools have been chosen on the basis that they have the most similar contextual information. The first comparator in the list is your school, the second is the closest school with similar SEN and FSM data, and the remaining schools are those of the same type with the most similar SEN and FSM data to yours.

School Name	LAESTAB	FSM %	SEN %	FTE pupils	Distance in miles	Spend per pupil (pounds)
St Leonard's CofE (A) First School	8603490	6.1	3.0	33	N/A	11,787
Moor First School	8602164	5.3	6.6	76	8.9	7,703
Nun Monkton Primary Foundation School	8155200	7.3	2.4	39.5	73.6	9,394
Heskin Pemberton's CofE VA Primary School	8883409	5.3	2.1	94	50.5	6,324
All Saints Anglican/Methodist Primary School	8913539	7.3	2.1	96	45.8	6,457
The Bramptons Primary School	9412012	8.2	3.1	98	68.0	6,068

The following charts provide a summary of the school's total expenditure split into 6 high-level categories.

We have also included a summary of total expenditure of the most local similar school. For a more detailed comparison please also use the [schools financial benchmarking service on GOV.UK.](#) or [View my financial insights](#)

### Expenditure: St Leonard's CofE (A) First School

### Expenditure: Moor First School

The DfE is working to rationalise and improve its overall benchmarking offer to schools and academies. This includes simplifying our services, ensuring we keep the best from the services we currently offer, and improving areas that are not as useful to users. As part of this, we are reviewing the usefulness of Benchmarking Report Cards. We would be very grateful for your thoughts and recommendations to ensure our offer remains user-centric. If you are interested in shaping the future of our Benchmarking offer, please contact us at
