

Addition

Year 1

Strategies	Concrete	Pictorial	Abstract				
Combining two parts to make a whole: part-whole model	Using a wide range of different resources: cubes, cars, teddies, acorns, etc 	Objects are represented by pictures, dots or crosses 	Use the part-part whole model to move into the abstract  <table border="1" data-bbox="1644 572 1800 652"><tr><td colspan="2">10</td></tr><tr><td>6</td><td>4</td></tr></table>	10		6	4
10							
6	4						
Starting at the bigger number and counting on	Start with the larger number and count on using bead strings, cubes or numicon 	A bar model that encourages the children to count on rather than count all 	Using a number line - starting at the largest number and counting on 12 + 5 = 17 				
Re-grouping to make 10	Using tens frames and counters/cubes or using numicon - start with the biggest number and use the smaller number to regroup to make 10. 	Children draw the tens frame and add counters/cubes  Children draw pictures, dots or crosses and regroup to make 10 	Children develop an understanding of equality 6 + □ = 11 6 + 5 = 5 + □ 6 + 5 = □ + 4				

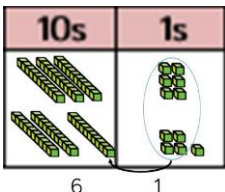

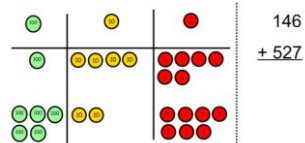

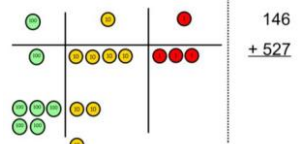

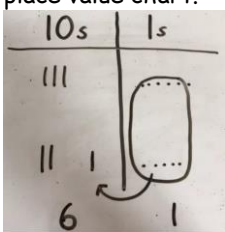

Addition

Year 2

Strategies	Concrete	Pictorial	Abstract
Add three single digits	$4 + 7 + 6 = 17$ Use number bonds to add $4 + 6 = 10 + 7 = 17$  (Always make 10 with two of the digits where possible)	Add together three groups of objects.  Draw a picture to recombine the groups to make 10.	Combine the 2 numbers that make 10 and add on the remainder. 
Use of base 10 to combine 2 numbers (TO + O)	Continue to develop understanding of partitioning and place value $41 + 8$ 	Children represent the base 10 pictorially ie lines for the 10's and dots/crosses/squares for the 1's. 	$41 + 8 =$  $1 + 8 = 9$ $40 + 9 = 49$
Use of base 10 to combine 2 numbers (TO + TO)	Continue to develop understanding of partitioning and place value. $24 + 15 =$ 	Jottings $33 + 24$ 	Formal method using partitioning: $24 + 15 =$  $30 + 9 = 39$

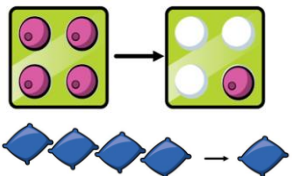

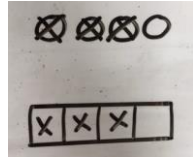

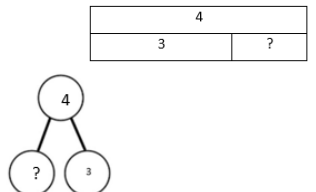

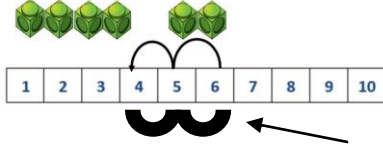

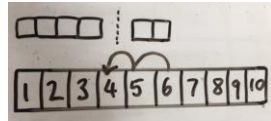

Addition

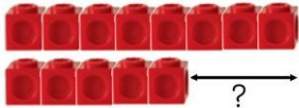

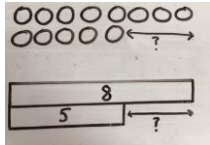

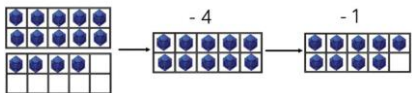

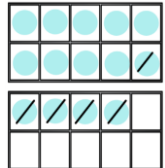

Year 3/4

Strategies	Concrete	Pictorial	Abstract
<p>Year 3 Use of base 10 and place value counters to combine 2 numbers - up to 3 digits. With re-grouping</p> <p>Year 4 As above but up to 4 digit numbers. With re-grouping</p>	<p>Continue to develop understanding of partitioning and place value. $36 + 25 =$</p>  <p>6 1</p>  <p>146 + 527</p> <p>Add up the rest of the columns, exchanging the 10 counters from one column for the next place value column until every column has been added.</p>  <p>146 + 527</p>	<p>Children represent the base 10 in a place value chart.</p>  <p>Children can draw a pictorial representation of the columns and place value counters to further support their learning and understanding.</p>	<p>Looking for ways to make 10.</p> <p>$36 + 25 =$</p> <p>1 5 $30 + 20 = 50$ $5 + 5 = 10$ $50 + 10 + 1 = 61$</p> <p>Formal method - partitioning</p> <p>$30 + 6$ $+ 20 + 5$ $50 + 11 = 60 + 1 = 61$</p> <p>Start by partitioning the numbers before moving on to clearly show the exchange below the addition.</p> <p><u>Expanded column</u></p> <p>124 + 673</p> <hr/> <p>7 90 700</p> <hr/> <p>797</p> <p><u>Compact column</u></p> <p>324 + 673</p> <hr/> <p>997</p> <p>Extend to use of method crossing tens</p>

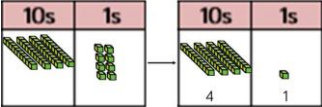

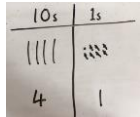

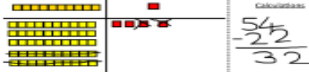

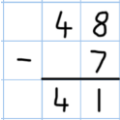

Subtraction

Year 1

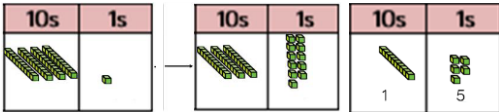

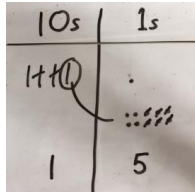

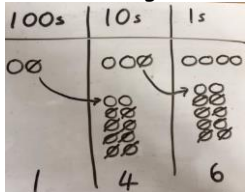

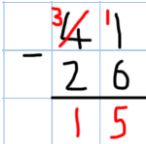

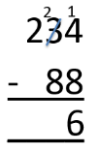

Strategies	Concrete	Pictorial	Abstract
Taking away ones	<p>$4 - 3 = 1$</p>  <p>Physically taking away and removing objects from the first whole number - using beanbags, numicon and other concrete objects.</p>	 <p>Children draw the concrete objects that they are using and cross out the correct amount.</p>	 <p>$4 - 3 =$ $= 4 - 3$</p>
Counting back	<p>Counting back using number lines or number tracks.</p> <p>$6 - 2 = 4$ Children start at 6 and count back 2.</p>  <p>When counting back show jumps below the line not above (counting on)</p>	<p>Children represent what they see pictorially.</p> 	<p>Children to represent the calculation on a number line or number track and show their jumps. Encourage children to use an empty number line</p> 

<p>Find the difference</p>	<p>Calculate the difference between 8 and 5. Use cubes, numicon or other concrete objects.</p> 	<p>Children to draw the cubes/other concrete objects which they have used or use the bar model to illustrate what they need to calculate.</p> 	<p>Find the difference between 8 and 5.</p> <p>8 - 5, the difference is <input type="text"/></p> <p><i>Children to explore why 9 - 6 = 8 - 5 = 7 - 4 have the same difference.</i></p>
<p>Part - whole model</p>	 <p>Link to addition- use the part whole model to help explain the inverse between addition and subtraction. If 10 is the whole and 6 is one of the parts. What is the other part? 10 - 6 =</p>	<p>Use a pictorial representation of objects to show the part part whole model.</p>	<p>Move to using numbers within the part whole model.</p>
<p>Make 10 using the ten frame</p>	<p>14 - 5 =</p> 	<p>Children to present the ten frame pictorially and discuss what they did to make 10.</p> 	<p>Children to show how they can make 10 by partitioning.</p> $14 - 5 = 9$ $\begin{array}{cc} & 5 \\ 4 & 1 \end{array}$ $14 - 4 = 10$ $10 - 1 = 9$

Year 2

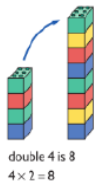

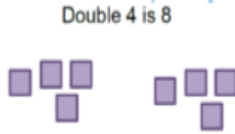

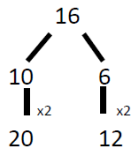

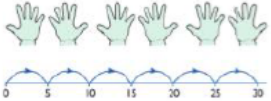

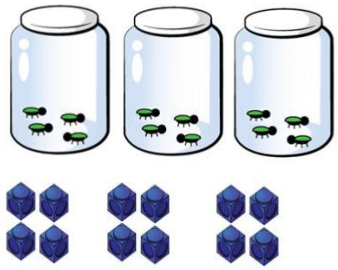

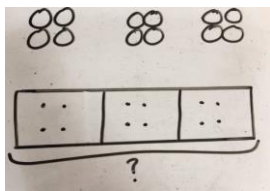

Strategies	Concrete	Pictorial	Abstract
Use of base 10 No exchange (TO - O) and (TO - TO)	<p>Column method using base 10</p> $48 - 7 = 41$ 	<p>Children represent the base 10 pictorially.</p>  <p>54 - 22 = 32 Draw the base 10 alongside written calculation.</p>  <p>36 - 14 = 22</p>  <p>43 - 18 =</p>  <p>10 - 8 =  so = 25</p>	<p>Column method or children could count back 7.</p>  <p>54 - 22 = 32</p> <p>50 + 4</p> <p>-20 + 2</p> <p>30 + 2</p>

Year 3/4

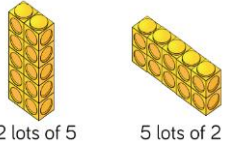

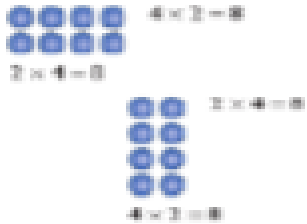

Strategies	Concrete	Pictorial	Abstract
<p><u>Year 3</u></p> <p>Column method - up to 3 digits with exchange</p> <p><u>Year 4</u></p> <p>Column method - up to 4 digits with exchange</p>	<p><u>Using base 10</u></p> <p>Column method using base 10 and having to exchange.</p> <p>$41 - 26 = 15$</p> 	<p>Represent the base 10 pictorially, remembering to show the exchange.</p>  <p>Represent the place value counters pictorially; remembering to show what has been exchanged.</p> 	<p>Formal column method. Children must understand that when they have exchanged the 10 they still have 41 because $41 = 30 + 11$.</p>  <p>Formal column method. Children must understand what has happened when they have crossed out digits.</p> 

Multiplication

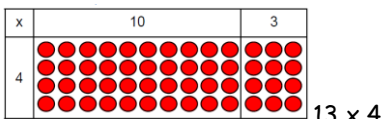

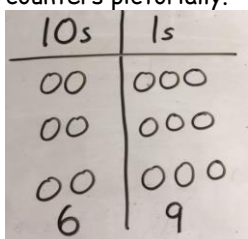

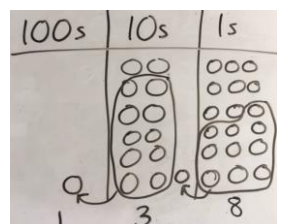

Year 1

Strategies	Concrete	Pictorial	Abstract
Doubling	<p>Use practical activities to show how to double a number.</p> 	<p>Draw pictures to demonstrate how to double a number.</p> 	<p>Partition a number and then double each part before recombining it back together.</p> 
Counting in multiples – using cubes, numicon and other objects.	<p>Count in multiples supported by concrete objects in equal groups.</p> 	<p>Use a number line or pictures to continue support for counting in multiples.</p> 	<p>Count in numbers of multiples aloud. Continue sequences of multiples of numbers.</p> <p>2 , 4 , 6 , 8</p>
Recognising and making equal groups – Repeated grouping/repeated addition	<p>Repeated grouping/repeated addition 3×4 $4 + 4 + 4$ There are 3 equal groups, with 4 in each group.</p> 	<p>Children to represent the practical resources in a picture and use a bar model.</p> 	<p>$3 \times 4 = 12$ $4 + 4 + 4 = 12$</p>

Year 2

Strategies	Concrete	Pictorial	Abstract
Arrays - showing commutative multiplication.	<p>Use arrays to illustrate commutativity counters and other objects can also be used.</p> $2 \times 5 = 5 \times 2$  <p>2 lots of 5 5 lots of 2</p>	<p>Draw arrays in different rotations to find commutative multiplication sentences.</p> 	<p>Children to be able to use an array to write a range of calculations</p> <p>e.g.</p> $10 = 2 \times 5$ $5 \times 2 = 10$ $2 + 2 + 2 + 2 + 2 = 10$ $10 = 5 + 5$

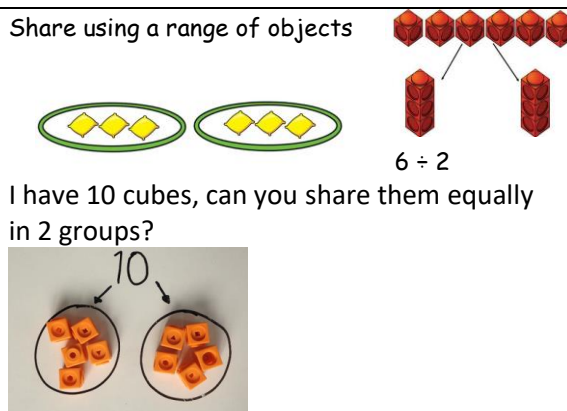

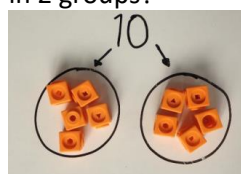

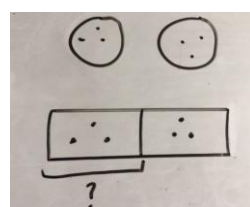

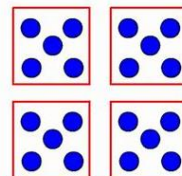

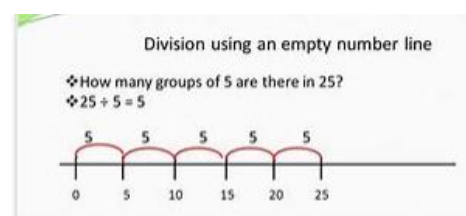

Year 3/4

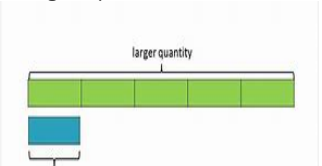

Strategies	Concrete	Pictorial	Abstract																				
<p>Formal column method - The grid method</p> <p>Year 3 (2 digit by 1 digit)</p> <p>Year 4 (2 digit by 1 digit/2 digit by 2 digit)</p>	<p>Show the link with arrays to first introduce the grid method.</p>  <p>Move on to using base 10/place value counters for a more compact method.</p>	<p>Children to represent the counters pictorially.</p>  <p>Children to represent the counters/base 10, pictorially e.g. the image below.</p> 	<p>Children to record what it is they are doing to show understanding</p> 3×23 $3 \times 20 = 60$ $3 \times 3 = 9$ $60 + 9 = 69$ <p>Children then record using the formal grid method.</p> 13×4 <table border="1"> <tr> <td></td><td>10</td><td>3</td><td></td></tr> <tr> <td>4</td><td>40</td><td>12</td><td>= 52</td></tr> </table> <p>Formal written grid method Eg 23×24</p> <table border="1"> <tr> <td></td><td>20</td><td>3</td><td></td></tr> <tr> <td>20</td><td>400</td><td>60</td><td></td></tr> <tr> <td>4</td><td>80</td><td>12</td><td></td></tr> </table> <p>So $400 + 60 + 80 + 12 = 552$</p>		10	3		4	40	12	= 52		20	3		20	400	60		4	80	12	
	10	3																					
4	40	12	= 52																				
	20	3																					
20	400	60																					
4	80	12																					

			<u>Formal method expanded</u> 23 X6 <hr/> 18 120 <hr/> 138 <u>Compact method</u> ⁵ 2 8 <u>X 7</u> 196
--	--	--	--

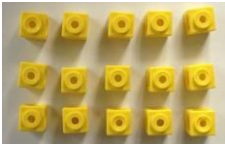

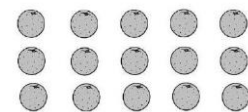

Division

Year 1

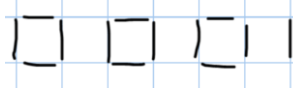

Strategies	Concrete	Pictorial	Abstract		
Sharing objects into groups	<p>Share using a range of objects</p>  <p>$6 \div 2$</p> <p>I have 10 cubes, can you share them equally in 2 groups?</p> 	<p>Represent the sharing pictorially</p> 	<p>$6 \div 2 = 3$</p> <table><tr><td>3</td><td>3</td></tr></table> <p>Children should also be encouraged to use their 2 times tables facts.</p>	3	3
3	3				
Division as grouping	<p>Divide quantities into equal groups. Use cubes, counters, objects or place value counters to aid understanding.</p> <p>$20 \div 5$, put into groups of 5</p> 	<p>Use a number line to show jumps in groups. The number of jumps equals the number of groups.</p> 			

		<p>Think of the bar as a whole. Split it into the number of groups you are dividing by and work out how many would be within each group.</p> 	
--	--	--	--

Year 2

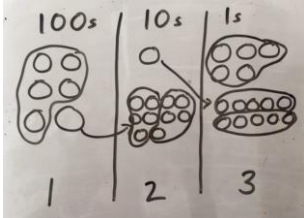

Strategies	Concrete	Pictorial	Abstract
Division with arrays - linking to multiplication	<p>Link division to multiplication by creating an array and thinking about the number sentences that can be created.</p>  $3 \times 5 = 15$ $5 \times 3 = 15$ $15 \div 3 = 5$ $15 \div 5 = 3$	<p>Draw an array and use lines to split the array into groups to make multiplication and division sentences.</p> 	<p>Find the inverse of multiplication and division sentences by creating four linking number sentences</p> $3 \times 5 = 15$ $5 \times 3 = 15$ $15 \div 3 = 5$ $15 \div 5 = 3$

Year 3

Strategies	Concrete	Pictorial	Abstract
Division with a remainder	<p>$2d \div 1d$ with remainders using lollipop sticks. Cuisenaire rods, above a ruler can also be used.</p> <p>$13 \div 4$</p> <p>Use of lollipop sticks to form wholes- squares are made because we are dividing by 4.</p>	<p>Children to represent the lollipop sticks pictorially.</p> 	<p>$13 \div 4 = 3$ remainder 1</p> <p>Children should be encouraged to use their times table facts; they could also represent repeated addition on a number line.</p> <p>'3 groups of 4, with 1 left over'</p>

	 <p>There are 3 whole squares, with 1 left over.</p> <div> <div> $20 \div 3 = 6r2$ $20 \div 5 = 4$ $20 \div 8 = 2r4$ $20 \div 7 = 2r6$ </div>  </div>	<p>There are 3 whole squares, with 1 left over.</p> $23 \div 7 = 3 \text{ r } 2$ <p>3 lots of 7 7 7 7 2 left</p> 	
<p>Larger 2 digit numbers by 1 digit using 'chunking' on a number line</p>		$86 \div 8 = 10 \text{ r } 6$ <p>10×8 6 left over</p> 	<p>Chunking 2 digit by 1 digit $67 \div 7$ $(7 \times 9 = 63)$ 4 left over $= 9 \text{ r } 4$</p> <p>Chunking 3 digit by 1 digit $872 \div 8$ $(8 \times 100) = 800$ $(8 \times 9) = 72$ So = 109</p>

Year 4 +

Strategies	Concrete	Pictorial	Abstract
<p>Intermediate step of long division</p>		<p>Represent the place value counters pictorially.</p> 	$ \begin{array}{r} 123 \\ 5 \overline{) 615} \\ \underline{5} \\ 11 \\ \underline{10} \\ 15 \\ \underline{15} \\ 0 \end{array} $
<p>Short division (up to 3 digits by 1 digit)</p>			<p>Then move onto short division scaffold.</p> $ \begin{array}{r} 123 \\ 5 \overline{) 615} \end{array} $
