

**Flickers Class
Curiosity Tasks**

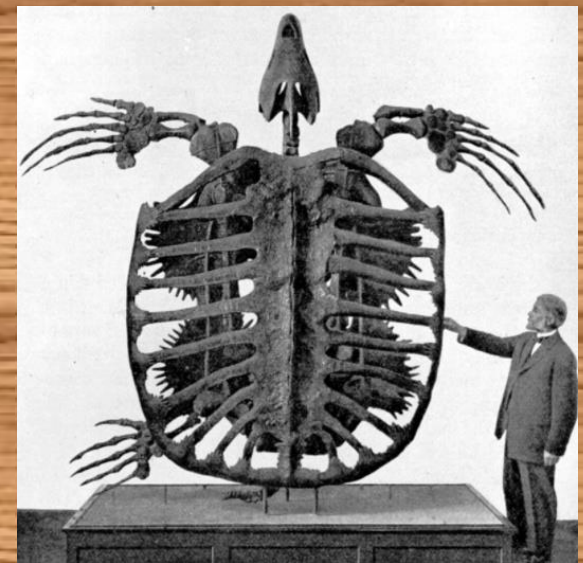

**Our topic is called
'sticks, stones and
bones'.**

Do you remember the fossil from last week? It was a giant turtle. Today you can open the brown envelope in your pack. See if you can match the fossils to the creatures.

With the first skull compare it to the evolution of skulls. Can you notice how the skulls change over time.

What questions could you ask a paleontologist about the fossils and the creatures?

Year 1 children to write down 3 questions and Year 2 children to write down 5 questions.

Making fossils is lots of fun. Make some home made playdough so that you can make some fossil imprints..

Ingredients – (makes 1 ball of play dough)

- 1 cup of plain flour
- 1/4 cup of table salt
- 1/2 cup of hot water (careful if kids are helping you with this bit)
- 2 tbsp cooking oil
- Food colouring of your choice

Method

1. Combine the dry ingredients in a large mixing bowl.
2. Add the food colouring to your hot water – you'll need to use a fair bit to get a vibrant colour. *I find gel colours give such a better colour.*
3. Carefully pour the coloured water into the dry ingredients.
4. Add the oil and mix.
5. Once cool enough use your hands and turn out on to a clean work surface.
6. Knead Knead Knead – the longer you knead the smoother the play dough will become.

Here are some ideas. Don't forget to upload yours to seesaw.
